

PROVIDING ENERGY THAT IS AFFORDABLE, RELIABLE AND CLEAN IS CRUCIAL AND EV'S ARE PART OF THIS

 **TOTAL** TO BECOME **THE RESPONSIBLE ENERGY MAJOR**

Reduce
the carbon intensity
of our production mix

Develop
renewable
energies

Improve
energy
efficiency

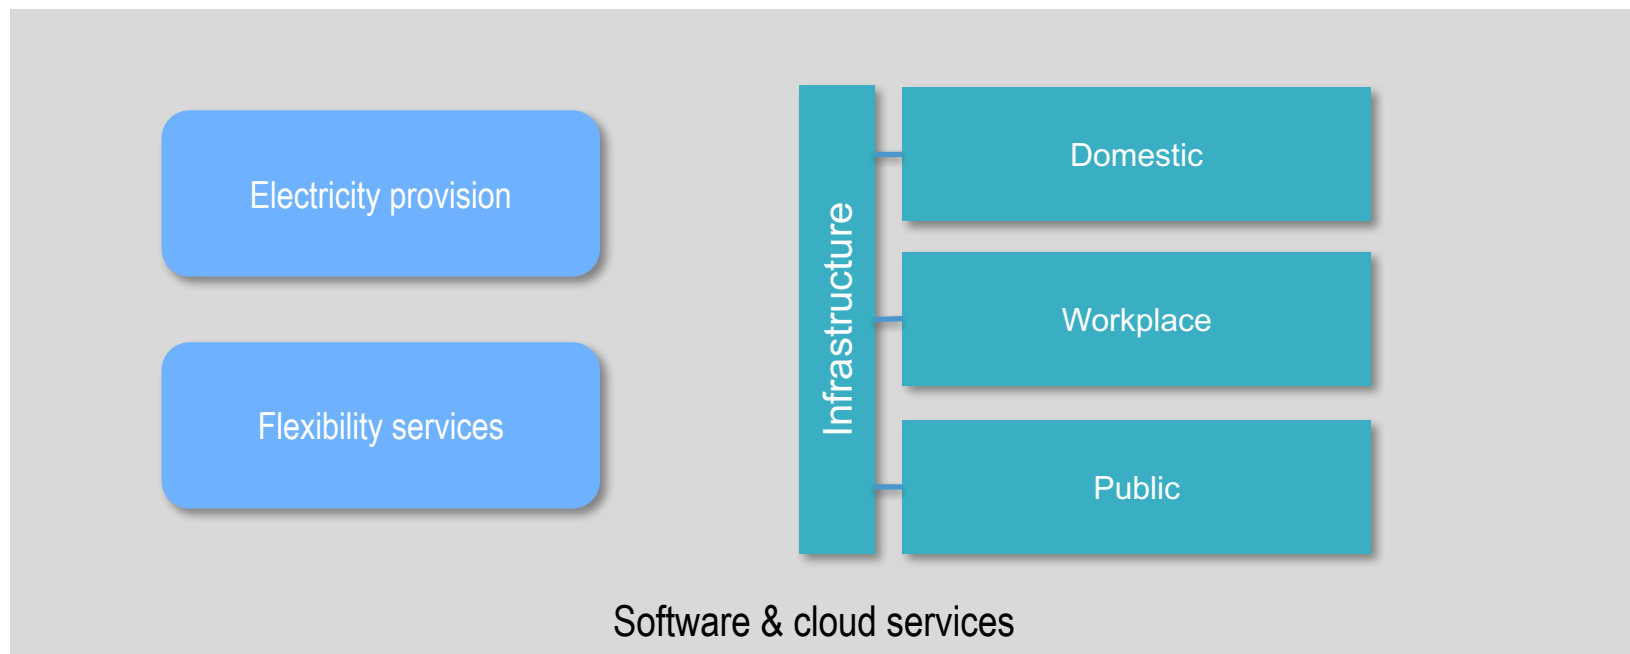

Europe

UK

FUTURE SERVICE WILL MOVE FROM PURE ENERGY SUPPLY TO BUNDLED MOBILITY SERVICE

- Integration of EV's with electricity supply, storage and smart software systems
- Offered through players offering the full service and through groups of partners
- Ultimately will help businesses to both optimally manage usage, open up new revenue streams, increase site resilience and reduce carbon footprint

SMART CHARGING IS CREDIBLE SOLUTION NOW FOR WORKPLACE & OTHER COMMERCIAL SETTINGS, BUT THERE ARE CONSIDERATIONS

- **Assessment of hardware options**
- **Future roll-out plans**
- **Capacity & power management**
- **Software capability & support**
- **Business models**
